Hello Mr. Deshmane:

I tried unsuccessfully to connect with you on your cell phone earlier today.

I just wanted to let you know that I received the ok from my boss to let you have the glycerin and the methanol if you want it also. We have haz cat and sampled both tanks and they exhibit the characteristics of pure glycerin and methanol. Both tanks are located outside for the start of their process.

If you decide that you do in fact want the products I would need the following from you:

1. A letter on your company letterhead stating the following:
 - that you intend to use the product(s) on site at your place of business;
 - what you intend to use the product for;
 - that you have storage available to keep product;
 - that you understand that the products are as is.

You don't have a lot of time. Late tomorrow we are scheduled to pump off the methanol tank for disposal so I need an answer swap.

The glycerin tank is scheduled to be pumped out on Saturday. So if you are interested please contact me on my cell or via email. Thank you.
